Presale Calculation Alignment

80% of total supply (800,000,000 AXN) at a presale price of **\$0.001875 per AXN** yields exactly **\$1,500,000.00**, perfectly matching the revised soft/hard cap fundraising target without rounding discrepancies.

Core Utility Drivers

1. Payment Settlement: Network gas and escrow fees denominated in native AXN.

2. Machine Reputation: Slashing mechanism forces operational honesty from agent operators.

3. Protocol Governance: Community ownership of fee tiers and app-chain parameters.
